# Drinkspector

for RF and AM systems

AWARD WINNING PROTECTION FOR TRADITIONAL HIGH THEFT BOTTLED DRINKS. INNOVATIVE AND ALMOST IMPOSSIBLE TO REMOVE.

# DRINKSPECTOR

Drinkspector™ is 100% tamper-proof and cannot be removed by force after installation. Utilising a flexible two piece design and through the use of the optional bottle cap you can completely prevent the opening of all bottles in store.

**Drinkspector™ can provide protection for almost all of the bottles being used today in the retail environment. Extremely robust, it is capable of withstanding product attacks of up to 100kgs in pull force.**

Drinkspector™ is a deceptively simple solution to what is often viewed as complex and expensive retail problem. Installation takes but a second; reduction in theft rates is immediate, delivering an instant improvement in the bottom line. Dependent upon theft rates ROI can be achieved in as little as 3 months making the Drinkspector™ one of the best valued retail theft prevention devices available today.

## KEY FEATURES:

- Simple two piece design
- Tamper proof
- Repels pull force attacks of up to 100kg
- Market leading 5 year warranty on locking mechanism
- Compatible with your existing RF or AM security system

## PRODUCT #

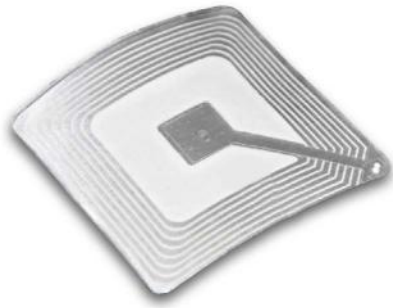

Product #	Description
<b>8.2 MHz RF Technology</b>	
P0700296	Drinkspector 8.2 MHz RF set - tag and cap - Red colour

# RF Paper labels

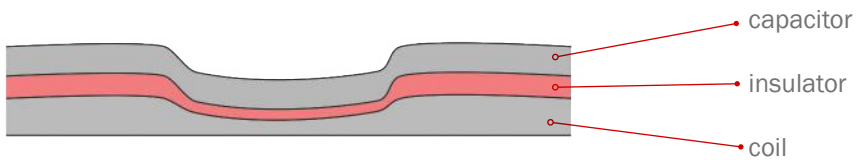

BASIC TOOL FOR FMCGs

## High quality in RF technology

### Optimized Circuit

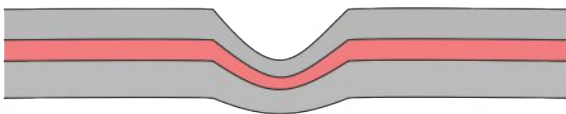

Our labels have an optimal circuit design that offers better detection range and reliability due to the higher quality factor and signal strength.

Shopguard label cross-section

### Unique Deactivation Mode

The layers are positioned in an innovative way to minimize the potential reactivation rate. The deactivation point is positioned in the middle of the capacitor.

competitor's label cross-section

## SAFETY WARNING

### Bending or folding

Do not bend or fold labels

### Electrostatic charge

Avoid electrostatic charge during application. It may worsen detection.

### Temperature

Do not expose labels to direct heat. Labels may work at 55 °C but contact surface loses its adhesiveness above 40 °C. Labels can be stored for 2 years between 0 °C and - 40 °C.

### Humidity

Do not use labels in high humidity. Recommended: 30% - 85% RH, not condensating.

### Fire

Keep away from fire.

### Metal

Not advised to use on metal and metallic surfaces .

### Pinching, cutting

Pinching and cutting may destroy completely the label structure.

# Checkout Lane Manager

## *Forget the crowded checkout lanes*

*A study has shown that a minute spent in a queue during shopping is felt two times more. Consumers can be so frustrated that they go elsewhere.*

When we talk about the services a shop can offer we mean different components:

number of available parking space, distance from home, traffic, is the consumer served by polite staff, or how much does it take to finally pay for the goods. On average, the last on list causes the most frustration. Our Checkout Lane Manager helps you to avoid frustration and solves the problem with a press of a button.

## Checkout Lane Manager

### Product Features

- Dedicated buttons to open or close a cash register
- Optional buttons for promotions and information
- Easy installation
- Optionally switches on and off label and tag deactivators
- Up to 6 or 8 checkouts can be operated with a single central control unit

### Benefits

- Gives straightforward info on which cash register is open
- Avoids long and crowded queues that deter consumers
- Comfortable and efficient for both shoppers and sellers
- Creates a positive attitude that eliminates negative experiences
- Saves time and boosts sales
- Visible and audible channel to communicate promotions and additional info
